The Town of Landis has been awarded a grant to make improvements to its sewer system, specifically as it relates to the reduction of inflow and infiltration (I & I). To determine the best use of the grant funds it is necessary for the engineering company under contract to design the improvements, to conduct surveys throughout the impacted area.

That area of concentration is currently the southeast sections of Landis. We expect these crews to complete their work within the next week or so. I hope this information proves helpful.
